**Preserving Classic Homes for the Future**

Repairing or improving an older home is a specialty trade best left to the unpracticed. It has been said, "they don't build them like they used to." That's not always a positive statement regarding homes built prior to the establishment of building codes. The labor put into these older homes is remarkable, but the materials used and structural designs are not always as good as they could be. ShadeTree Service has the expertise to enhance your home combining the best of both eras. We would welcome the opportunity to discuss your project with you, and describe how we can make your home everything you want it to be.
